Re: Technical Memorandum
Upper Aquifer Investigation
Monitoring Well and Sampling Proposal
ACS NPL Site, RD/RA

Dear Ms. Bianchin:

On behalf of the ACS NPL Site RD/RA Executive Committee, Montgomery Watson has completed the Upper Aquifer Investigation and prepared a Technical Memorandum to report the findings. The work was completed in accordance with the approved statement of work and specific operating procedures for the site. As you have requested, we are providing five copies of the Technical Memorandum to U.S. EPA, five copies to Indiana Department of Environmental Management (IDEM), and two copies to Black and Veatch Waste Systems.

We are enclosing a 3.5 inch, floppy diskette to you, IDEM, and Black & Veatch, containing the investigation data in electronic format. The "readme.doc" file provides a summary of the files contained on the diskette. In response to your request, we have also compiled the field GC back up information, including the GC analysis curves. The compiled data represents approximately two inches of paper and so we have not included it as an appendix the technical memorandum at this time. A copy of the data will be shipped to you, IDEM, and Black & Veatch under separate cover. Additional copies can be provided at your request.

Following your review and comment on this Technical Memorandum, we will prepare a sampling plan to complete the monitoring wells and collect groundwater samples to complete the upper aquifer investigation. In the meantime, if you have questions, please do not hesitate to call me at (708) 691-5020.

Sincerely,

MONTGOMERY WATSON

Peter J. Vagt
Vice President
Principal Hydrogeologist
